PREFACE

The advent of the Competence-Based Curriculum (CBC) heralds a new era of dynamic and practical learning experiences designed to equip learners with the 21st century skills. It marks a trans-formative step in improving education quality and relevance.

The **French Language Teaching Module** has been designed in line with the Competence Based Education principles which seeks to link education to real life experiences. The General Competences provided in the 2023 Zambia Curriculum Framework are linked to the content of this module.

The module aims to support French teachers in the implementation of the Competence Based Curriculum in the absence of approved text books. It therefore reflects the Ministry's unwavering commitment to making this journey as smooth as possible for teachers. However, teachers are encouraged to supplement this module with their own research and innovations in order to address any gaps that may arise during implementation.

I hope teachers will make good use of this resource.
